

This custom level was made by me in Far Cry 5 editor.

First player goes upstairs to get a better vantage point.

Second player waits for the first player to get into position.
This player will attack the base from ground.

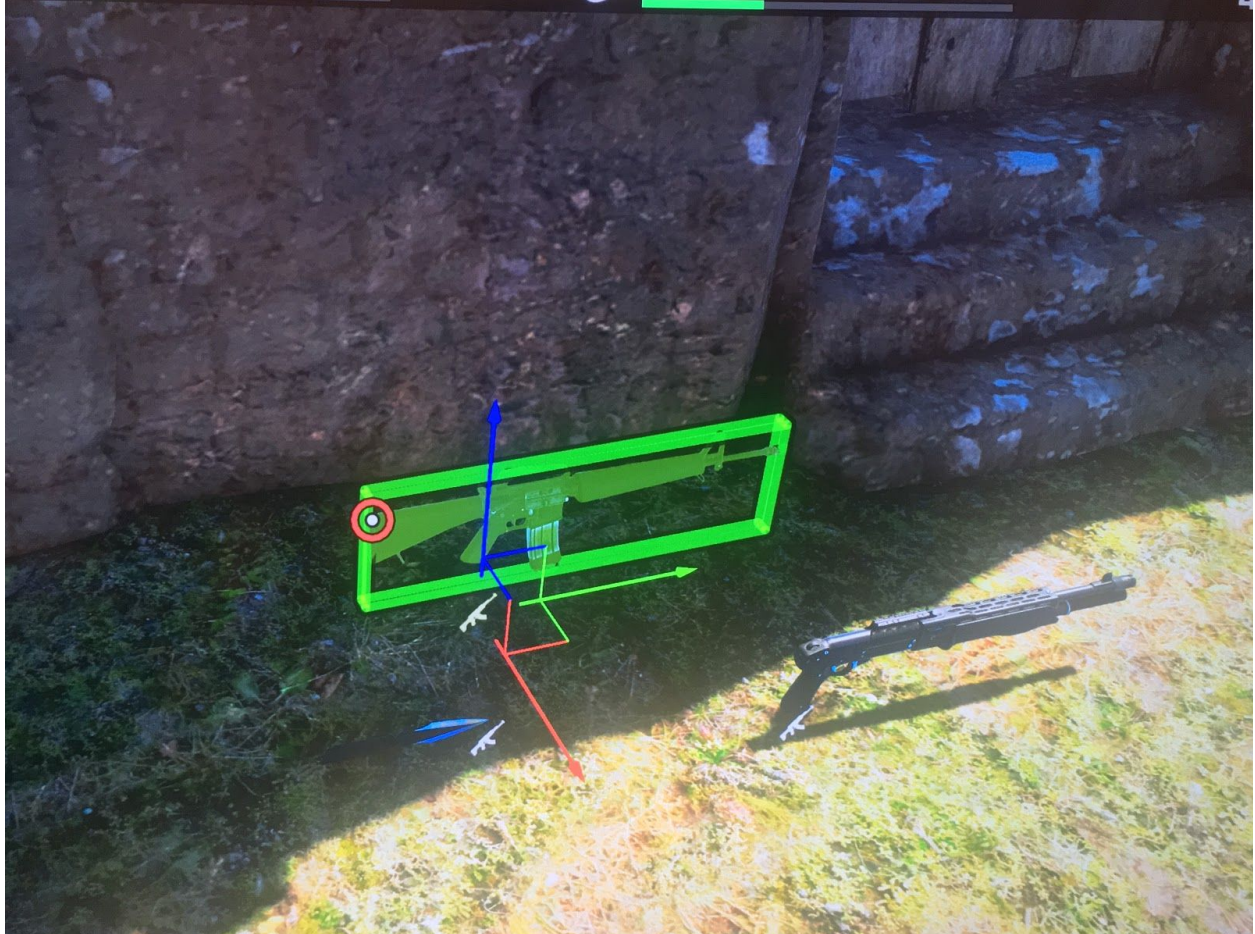

First player gets a rifle and a grenade since he needs accuracy and has a better view of the base.

If he climbs up the ladder to a higher roof, he can acquire a sniper rifle which is more precise.

The second player gets an assault rifle, a shotgun and a throwing knife.

This is a view from the first roof. The first player can clearly see enemies and the second player (who doesn't see enemies hiding behind the wall).

This map is uploaded to Far Cry 5 community. Search by my nickname DaniyarS2012.
